

IMPORTANT SAFETY INSTRUCTIONS

SAVE THESE INSTRUCTIONS

This manual contains important safety and operating instructions for power units
READ AND FOLLOW ALL SAFETY INSTRUCTIONS

-WARNING-

Reference the National Electrical Code, specifically for the installation of wiring and clearances from power and lighting conductors. Installation work and electrical wiring must be done by qualified person(s) in accordance with all applicable codes and standards, including fire-rated construction. Risk of Fire. Installation involves special wiring methods to run wiring through a building structure. Consult a qualified electrician. Mount the unit at a height greater than 1 foot from the ground surface.

FDHP-DRIVER

20 to 100% dimmable

For recommended dimming, the driver requires a minimal load of half of its total capacity. Drivers are dimmable with most regular low voltage electronic dimmers.

1

Knock out

Open the cover to the make connections.
 Remove the appropriate knock out for your installation.

3

Install the included strain relief bushing in the appropriate hole then push the wires through the connector. Make connections in the compartment: match the white wire from the line feed with the white wire from the LED driver, match the black wire from the line feed with the black wire from the LED driver with the included wire connectors, match the copper wire from the line feed with the green wire from the LED driver

2

Unshield the line feed wire 3" (7.5cm) and strip wires 3/8" (1 cm).

4

Close the cover, then connect the fixture to the output wire where red wire is (12VDC+) & black wire is 12VDC-

Installation instructions

WARNING - BEFORE STARTING INSTALLATION, SHUT THE LINE FEED POWER OFF USING THE CIRCUIT BREAKER. - WARNING
